Education

R V College of Engineering

BE in Information Science and Engineering

CGPA: 9.06

Aug 2023 – 2027

Bengaluru, Karnataka

Sri Sathya Sai Loka Seva PU College, Alike

PUC - PCMB

Percentage: 97.66

Sep 2021 – March 2023

Dakshina Kannada, Karnataka

Relevant Coursework

- Data Structures
- Database Management
- Operating Systems
- Computer Networks
- Algorithms Analysis
- Machine Learning
- Web Development
- Internet of Things

Experience

Schneider Electric

Software Development Intern

July 2025 – Sep 2025

Bengaluru, Karnataka

- Collaborating in a team of 4 members under the guidance of a Senior Architect.
- Developing a prototype for detecting errors in a home automation system using event sourcing logs and machine learning.
- Collecting large-scale sensor and system event data, including deliberately introduced faults, to train models for anomaly detection and corrective action recommendations.
- Implemented Random Forest algorithm to identify anomalies in system behavior and improve reliability through accurate failure detection.

Projects

KCET EduGuide-Personalized Rank-to-College Advisor | Node.js, Express.js, React, EC2, S3, Vercel April 2026

- Developed KCET EduGuide, a full-stack counselling platform used by 70+ students, that helps students to prepare KCET counselling choice lists through personalized rank-based recommendations and automated choice management.
- Built frontend using React, TypeScript, Tailwind CSS, and with responsive UI, interactive cutoff visualizations with Recharts, PDF choice list generation, JWT-based authentication, and advanced filtering for colleges, branches, categories, locations, and counselling rounds.
- Developed a Node.js and Express backend with MongoDB, implementing recommendation algorithms, secure JWT authentication, mentor verification, meeting management, and RESTful APIs for real-time data access.
- Deployed the application using Amazon EC2 for the backend, Vercel for the frontend, and Amazon S3 for hosting images and branch insight JSON files.

Topic-Based Micro-Subscription Learning Platform | Django, React, TypeScript, MySQL, MinIO March 2026

- Developed a topic-based micro-subscription learning platform enabling users to purchase individual topics instead of full courses, providing a flexible and cost-effective learning experience.
- Built a full-stack application using Django REST Framework and React + TypeScript with JWT authentication, integrating wallet-based payments, atomic transactions, and MinIO-based storage for markdown content and videos.
- Implemented role-based access control, real-time discussion using WebSockets, problem contribution and admin verification system with reward mechanism, and progress tracking with a professional dashboard UI.

Technical Skills

Languages: C++, C, Python, HTML/CSS, JavaScript, Matlab

Tools: Django, Flask, AWS(Basics)

Frameworks: Linux, GitHub, Power BI, ThingSpeak

Languages: English, Kannada

Achievements

Winners - Datathon at Dayananda Sagar Academy of Technology and Management

Nov 2025

VTU State level Volleyball Competition Winners

Feb 2024
